Summary

Product-minded builder with 4+ years shipping consumer and enterprise features end-to-end, now transitioning into Product Management. Combines hands-on ownership (60+ campaigns launched, 25 enterprise clients managed) with active PM training (NextLeap PM Fellowship) and a self-driven product case study taking a feature concept from research through a full pitch deck. Skilled at translating user needs and data into roadmaps and driving execution cross-functionally from concept to delivery.

Experience

Full Stack Engineer

Apr 2025 – Present

Bazaarvoice

Bengaluru, India

- Owned end-to-end delivery of campaign tooling used by high-value client accounts, standardizing workflows to cut average setup time by 50% without sacrificing customization
- Designed and shipped an automated workflow that deployed 60+ client campaigns during peak Holiday Season, directly protecting seasonal revenue for key accounts
- Partnered directly with client-facing stakeholders to translate business requirements into shipped product functionality under tight seasonal deadlines

Associate Software Engineer

Aug 2022 – May 2024

Bazaarvoice

Bengaluru, India

- Built and maintained scalable web applications using React, Redux, and Node.js, serving millions of daily active users across enterprise client platforms
- Led migration of mission-critical backend infrastructure from Ruby on Rails to TypeScript with zero downtime, reducing long-term maintenance overhead
- Co-designed RESTful APIs with cross-functional teams, improving data retrieval efficiency by 35% and unblocking downstream product features
- Maintained 99.5% uptime SLA on client-facing applications while resolving critical production issues, safeguarding customer trust and retention

Software Engineer Intern

Feb 2022 – Jul 2022

Bazaarvoice

Bengaluru, India

- Modernized legacy Ruby on Rails services into scalable TypeScript architecture; reduced runtime latency by 40% through targeted performance refactoring
- Raised unit test coverage from 75% to 90% by championing TDD practices and mentoring peers on testing standards

Projects

Product Case Study – "Habit-Led Predictive Cart"

Self-Initiated

- Independently researched a retention gap in tier-2/3 city e-commerce user cohorts and designed a predictive-cart feature concept to address it, as part of ongoing PM training
- Built a full product pitch deck covering problem framing, target users, proposed solution, and success metrics to validate the concept

Key Achievements

- Delivered 100+ client campaigns in a single quarter while managing concurrent implementations for 25 enterprise clients at 100% on-time delivery
- Reduced deployment regression issues by 70% through CI/CD pipeline integration, improving release reliability for product launches

Skills

Product & Execution: Roadmapping, User Research, Feature Prioritization, Cross-Functional Collaboration, Stakeholder Management, Agile/Scrum, Metrics-Driven Decision Making

Technical Fluency: React, Redux, Node.js, TypeScript, REST APIs, SQL, Git, CI/CD (Jenkins, GitLab CI), Python

Tools: Jira/Agile tooling, GitHub Copilot, Jest, Client-Server Architecture

Education

B.M.S. College of Engineering, Bengaluru, India

Jan 2018 – Jul 2022

Bachelor of Engineering in Computer Science
